Re: Emery Industrial Resources, Inc., Cherry Hill Park Mine, S/049/021, Utah County, Utah

Dear Mr. Powell:

My reason for writing to you is two fold. First, to ask about the status of the large mine permit application for the Cherry Hill Park operations. Some time ago we had discussions regarding the permitting requirements for going from a small mine operation to a large mine operation. To date the Division has not received information from you regarding a transition from a small mine to a large mine. Do you still have intentions of going to a large mine operation at this site?

Second, the Minerals Program now has four technical staff members. As a result of this staff increase we have redivided the state into four sections of permit lead responsibility. Mr. Lynn Kunzler will be the new Minerals Program permit lead (contact) for operations in the north-central part of the state which includes Utah County (see attached map). Please direct any future inquiries regarding your operation in Utah County to Mr. Kunzler. I will be working with Mr. Kunzler on permitting issues during the transition period of permit lead responsibilities. I would like to perform an inspection of your site sometime within the next three weeks (July 11 - 29) to review the status of your operations, and familiarize Mr. Kunzler with the site. I will be calling you during the first half of next week to schedule an inspection.

During the last inspection, you agreed to provide the Division with a copy of a June 1993 map of the site. If this map is still available it would be useful for us to have a copy on file.

Sincerely,

Anthony A. Gallegos
Reclamation Engineer
